Create a new repository
A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.
Owner
dennislabvisualizations
Repository name *
codemin1_control_exclusions_F_
1
Name the repository after the dataset used to produce the visualization.
Great repository names are short and memorable. Need inspiration? How about expert-meme?
Description (optional)
Public
Anyone can see this repository. You choose who can commit.
2
Private
You choose who can see and commit to this repository.
Skip this step if you're importing an existing repository.
Initialize this repository with a README
This will let you immediately clone the repository to your computer.
Add .gitignore: None
Add a license: None

Choose the visualization html file. Make sure to rename the file to "index.html", or the hosting will not work.
Quick setup — if you've done this kind of thing before
Set up in Desktop
or
HTTPS
SSH
https://github.com/dennislabvisualizations/codemin1_control_exclusions_F_pre180_2019
Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.
If the repository is empty, this option will be available. If it isn't empty, see next page.
...or create a new repository on the command line
echo "# codemin1_control_exclusions_F_pre180_2019-11-04_cov_min_case_25_female" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/dennislabvisualizations/codemin1_control_exclusions_F_pre180_2
git push -u origin master
...or push an existing repository from the command line
git remote add origin https://github.com/dennislabvisualizations/codemin1_control_exclusions_F_pre180_2
git push -u origin master
...or import code from another repository
You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

About

Automatically delete head branches
Deleted branches will still be able to be restored.
Scroll down to the GitHub Pages Section of the settings. In the Source dropdown select “master branch”.
GitHub Pages
GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.
Source
GitHub Pages is currently disabled. Select a source below to enable GitHub Pages for this repository. Learn more.
None
Select source
master branch
Use the master branch for GitHub Pages.
master branch /docs folder
Use only the /docs folder for GitHub Pages.
None
Disable GitHub Pages.
theme using the master branch. Learn more.
Make this repository private
Hide this repository from the public.
Make private
Transfer ownership
Transfer this repository to another user or to an organization where you have the ability to create repositories.
Transfer
Archive this repository
Mark this repository as archived and read-only.
Archive this repository
Delete this repository
Once you delete a repository, there is no going back. Please be certain.
Delete this repository

Add all commits from the head branch onto the base branch individually.

After pull requests are merged, you can have head branches deleted automatically.

☐ **Automatically delete head branches**
Deleted branches will still be able to be restored.

**Now following this link returns the visualization.**

## GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

Your site is ready to be published at https://dennislabvisualizations.github.io/codemin1_control_exclusions_F_pre180_2019-11-04_cov_min_case_25_female/.

**Source**
Your GitHub Pages site is currently being built from the `master` branch. Learn more.

master branch ▾

**Theme Chooser**
Select a theme to publish your site with a Jekyll theme. Learn more.

Choose a theme

**Custom domain**
Custom domains allow you to serve your site from a domain other than `dennislabvisualizations.github.io`. Learn more.

Save

☑ **Enforce HTTPS**
— Required for your site because you are using the default domain (`dennislabvisualizations.github.io`)

HTTPS provides a layer of encryption that prevents others from snooping on or tampering with traffic to your site.
When HTTPS is enforced, your site will only be served over HTTPS. Learn more.
